R.O.C.No. 6281-II/41, dated 14th December 1941

Sub:- Veterinary Hospital, Mangalore - Sinking a well for residential quarters - sanction requested.

Work Well

no. mitt

I have the honour to state that the Veterinary Hospital, Mangalore and the quarters of the staff (Veterinary Assistant Surgeon, Compounder and Attendants) are situated on either side of a public road. There is a well in the compound of the Veterinary Hospital, but there is none in the compound of the residential quarters. The well attached to the hospital is about half a furlong from the quarters, but for some months in the year especially during dry years, it becomes completely dry. The nearest municipal public well is about a furlong and a half away and the occupants of the quarters are inconvenienced very much for want of a proper water supply.

2. The question of deepening the hospital well was

.mined by the Public Works Department during the year 1931 and
dropped on account of certain technical difficulties in
gard to the soil. Under the circumstances, it is proposed to
ık a well in the compound of the quarters common to all the
idents, viz., the Veterinary Assistant Surgeon, the Compounder
Attendants and an estimate amounting to Rs.1,650/- received
m the Executive Engineer, West Coast Division, Calicut is sent
ewith together with a copy of the Mangalore Sub-Divisional
icer's report No.2219-E., dated 31st October 1941. I request
ıt Government may be pleased to accord their administrative
ıction for the sinking of the well. Necessary funds will be
ovided in the 'minor works' budget of this Department for
42-43.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Veterinary
Services, Madras.

DISTRICT VETERINARY OFFICER
24 NOV 1941

Copy of letter No.2219 E dated 31-10-41 from the Sub Divisional Officer, P.W.D.Mangalore to the Executive Engineer, West Coast Dvn.

Ref. Dvl. No.1547 N dated 9-9-41 and 3324 M dated 3-10-41

Sub. Veterinary hospital, Mangalore- sinking a well approximate estimate.

I submit herewith an approximate estimate for Rs.1650 for sinking a well in the compound of the quarters of the Asst.Surgeon, compounders and menials of the Veterinary hospital,Mangalore. The estimate is based on D.R 35/41-42 Rs.2080 for sinking a well in the Govt.College Mangalore which works out to a rate of Rs.30/- per Rft. A depth of 55' below parapet or 52' below ground at the site selected by the water diviner will be necessary. The depth of the neighbouring wells in the compounds of Mr.G.Lobo and Mr.Periera are 50' and 36½' respectively below parapet. The bottom levels are 50.00 and 53.12 respectively. On enquiry it is learnt that there will be no water in the former well and 1' of water in the latter during summer . The soil of well in the compound of Mr.Lobo is laterite from about 4' below ground, the bottom 2' to 3' being granite. The soil of well No.2 is also laterite from about 4' below ground and that at bottom is loose earth.

To have adequate supply in the proposed well it is to be taken to a depth of 52' (bottom level 45.00 and ground level 97.16).

The borings are intended to test the yield and it can be usefully done only in summer as suggested by the Executive Engineer. It can be started in March 42 or 1st week of April 1942. Meanwhile the Dt. Veterinary officer,Calicut may kindly be requested to arrange for including the work in the list of minor works for 42-43.
